1 - What are hooks

What are hooks

Hooks are a feature introduced in `React 16.8` that allow you to use state and other React features without writing a class. They are functions that let you "hook into" React state and lifecycle features from function components.

State

▼ Functional
  notion-block-98abad88bada4c2aa06c26556cb16e15 code not supported

▼ Class Based
  notion-block-8112e9c51caf4d38a5d0393484e8e962 code not supported

Lifecycle events

▼ Functional
  notion-block-e65bb3fb5af644c6a78fc43fe87430dd code not supported

▼ Class based
  notion-block-abced6598ae446d6b88e22029a539d2a code not supported

▼ Functional solution
  notion-block-45b93070aebd4fbc968f3b7d7e2e6db5 code not supported

Until now we're seen some commonly used hooks in React-

1. useState

2. useEffect

3. useMemo

4. useCallback

These hooks are provided to you by the `React` library.
